PERSONAL PROJECTS

NONCREATIVEBLOG

[Source code](#) | [Website](#)

- Developed a personal blog using Next.js 13, showcasing proficiency in modern web development technologies.
- Implemented custom styling with CSS/SCSS for a unique and tailored visual experience.
- Ensured complete freedom for customization, providing a platform to express personal ideas and information.
- Prioritized user experience, allowing visitors to explore content within their own web environment, avoiding reliance on off-the-shelf platforms.

VÖLUSPIRA

[Website](#)

- Developed an informative website dedicated to the Völuspá (Codex Regius) with a user-friendly interface.
- Implemented a feature allowing users to directly read the Völuspá on the website.
- Integrated a built-in dictionary to assist readers in understanding complex words and expressions.
- Please note that source code cannot be provided due to copyright reasons.

NONCREATIVEBLOG – MOBILE APP

- Conceptualized and developed a mobile app integrated into the blog's ecosystem to enhance user experience, specifically catering to the predominantly mobile (mostly Android) user base.
- Currently undergoing Google's review process, with successful completion of initial tests, anticipating availability on the Google Play store soon.
- Demonstrated commitment to user convenience by offering the option to share the apk file or app-bundle for early access and testing.
